

DriverTrainer™

As the global authority on safe driving practices, Smith System trains tens of thousands of drivers each year, including more than half of the current Fortune 500 fleets. Our instructors can help any driver in any vehicle and any environment improve their driving habits to prevent crashes, reduce fuel and maintenance costs while ultimately, preventing injuries and saving lives.

In the DriverTrainer course, your company's trainers learn how to demonstrate the Smith System methodology, to identify weaknesses in driving behavior and to provide personalized training to identify and correct problems.

Course Description

Smith System will conduct the DriverTrainer course at any location, no matter where you are in the world. The course is available in a four-day session with up to four trainees or a five-day session for up to six trainees. While each training day includes classroom instruction, the majority of the training occurs behind the wheel.

Training is based on the trusted Smith5Keys® to reinforce good driving habits and reduce risks behind the wheel. This course covers:

- Fundamentals of the Smith System, including the safe driving concepts behind The Smith5Keys
- How to create a dynamic Smith5Keys presentation and foster a positive attitude in the classroom
- Developing on-road observation, demonstration and coaching skills
- How to properly evaluate a driver and fill out the Driver Evaluation Form to motivate and improve driver decisions and actions

A DriverTrainer Recertification course is available to ensure that your company's driver trainers are equipped with the latest information, skills, knowledge and techniques. Certified driver trainers are required to take this course every two years to remain certified.
